

Medicine, Medicine, Medicine

Johannes Albes

Verse:

My mother asked me, baby
Please think that over well
Must learn from dusk till dawn
Like sitting in a cell

My brother told me, lady
Can you even see blood?
It's worse than horror movies
Look into severed guts

My friends said, Sadie, Sadie
You'll be on call at once
Never see the bed
And that 10 times a month

My grandpa told me, maybe
It is a good idea
But don't you dare to tell me
What pills I have to take

My father asked me, can we
Offer you something else
How 'bout architecture
Then join me in my firm

My uncle shouted: Crazy
You'll never climb the stair
The hierarchy is gruesome
You end up in despair

Grandma however said to me
It's better than it seems
To cure someone is worth it
Why not fulfil your dreams

Refrain:

Medicine, medicine, medicine
There's nothing else what matters
Medicine, medicine, medicine
And there is no plan B

Medicine, medicine medicine
I'm gonna study medicine
Medicine, medicine, medicine
That's where I want to be
